

## Contents of Week 7

### Topics

This week you have access to the last set of learning materials related to Topic 6, "Mitigation techniques and solutions". The learning materials related to Topic 7, "Oceanographic Data Management Platforms" are also made available.

### Resources

The lecture "Polymers identification: a critical step for plastic recycling" is presented by Prof. Ana Clara Marques, from Instituto Superior Técnico. She addresses several issues related to plastic recycling. Several videos are included to illustrate some of the aspects being described.

The lecture about "Oceanographic Data Management Platforms" is presented by Dr. Francisco Campuzano, from the CoLAB Atlantic. The lecture is divided in three parts: i) Part I: Introduction and Observing Systems; ii) Part II: Data Formats and EU Aggregators; Part III: From Data to Products and Services. The videos with the lecture are made available together with the pdf file containing the corresponding powerpoint version.

As usual, advanced learning materials are available for those who may be willing to deepen knowledge on those subjects.

### Activities

This week, the fifth quiz will be launched. It includes questions related to the subjects discussed in Topic 4, "Techniques to characterize water pollution". The quiz will be opened on the 5<sup>th</sup> of May and, if you wish, you may repeat it once (you have two attempts to answer to the complete quiz). You may submit your answers until the 13<sup>th</sup> of June. The best grade obtained in those two attempts will be considered.

The sixth Social Networking Activity is also launched. Do not miss the surprise activity our Ulisses mentors have prepared for you!

Enjoy the week!

Ulisses Team
